

# Research Data Management Plan

DMP Created Date:	2016-09-14T21:44:42.782Z
Project Title:	Project to test the DMPOnlineTool
Project Start Date:	2016-09-14T21:44:42.782Z
Project End Date:	
Contributor First Name:	Joanne
Last Name:	One
Affiliation:	University of Auckland
Email:	joanne.one@auckland.ac.nz
Funding Agency:	Royal Society of NZ
Funding ID:	72935
Document Short Name:	Ethics committee approval
Summary:	The ethics committee has allowed me to test on humans and publish their data, as long as they provide informed consent.
Type of Data:	EEG data
Description:	Lots of EEG data from people in raw format.
Data Collection Process:	Collected from peoples\' brains using a computer.
Data Organisation Process:	Organised in heaps of folders, really deep and really wide.
Data Storage Process:	Store it on my laptop, might put it on a USB.
Meta Data Requirement:	I will write what the data are about in my lab book.
Copyright Owner:	University of Auckland

Data Access:	restricted
Data Access Detail:	Restricted because of reasons.
Release Date:	2016-09-14T21:44:42.782Z
Compliance Process:	I will keep it on a USB in my pocket.
Type of Data Retention:	medical
Data must be retained after submission of thesis or publication of results until:	2016-09-14T21:44:42.782Z
Data Publication Process:	I will publish it on a discipline-specific repository.
Data Licensing:	CC-0
License Logo:	link.to/logo
The long-term preservation plan for the dataset:	This data should be stored forever because it\'s super important.
Research Data Management Contact:	2
Required Resources:	I will need a VM with 20TB of RAM.
Data Issues:	cultural
Issues Description:	Some cultures believe that EEG captures your soul.
Policy Control Body:	Department of Brains
Policy Requirements:	4.1.1. The researcher is required to tell four friends about their research, and ask those friends to tell four friends.
